Information Retrieval

Lecture 1

Duplication of course material for any commercial purpose without the explicit written permission of the professor is prohibited.

These course materials borrow, with permission, from those of Prof. Cristina Videira Lopes, Prof. Alberto Krone-Martins, Addison Wesley 2008, Chris Manning, Pandu Nayak, Hinrich Schütze, Heike Adel, Sascha Rothe, Jerome H. Friedman, Robert Tibshirani, and Trevor Hastie. Powerpoint theme by Prof. André van der Hoek.

Today

- Logistics
- Course goals
- Introduction

- Professor: Crista Lopes <lopes@uci.edu>
- Tas & Readers
 - See Canvas

- The course is on Canvas
- **Lectures:** in-person
 - Slides will be online during the entire quarter.
- **Discussion Sessions:**
 - In-person
- **Quizzes/Exam:** synchronous at the scheduled times
 - On paper
 - Everyone: in class!
 - Students with official DSC accommodations: at DSC, at the same time
- **Final Grade:** Projects (50%) + Quizzes (25%) + Exam (25%)

- Office hours
 - See Canvas
- TAs & Readers can be reached via Ed Discussion, and during discussion sessions and their office hours

Additional book

Introduction to Information Retrieval

This is the companion website for the following book.

[Christopher D. Manning](#), [Prabhakar Raghavan](#) and [Hinrich Schütze](#), *Introduction to Information Retrieval*, Cambridge University Press. 2008.

You can order this book at [CUP](#), at your local bookstore or on the internet. The best search term to use is the ISBN: [0521865719](#).

The book aims to provide a modern approach to information retrieval from a computer science perspective. It is based on a course we have been teaching in various forms at [Stanford University](#), the University of Stuttgart and the [University of Munich](#).

We'd be pleased to get feedback about how this book works out as a textbook, what is missing, or covered in too much detail, or what is simply wrong. Please send any feedback or comments to: [informationretrieval \(at\) yahoogroups \(dot\) com](mailto:informationretrieval(at)yahoogroups(dot)com)

Online resources

Apart from small differences (mainly concerning copy editing and figures), the online editions should have the same content as the print edition.

The following materials are available online. The date of last update is given in parentheses.

Goals

- For you to know the fundamentals of information retrieval

- For you to know the fundamentals of information retrieval
- For you to have at your disposal some techniques to find information spread among 10^n documents

- For you to know the fundamentals of information retrieval
- For you to have at your disposal some techniques to find information spread among 10^n documents
- For you to practice Web crawling and **to build your own simple search engine from scratch**

This course answers three primary questions

- What is information retrieval?
- How to build some of the most important blocks of information retrieval systems?
- How to perform information retrieval on the web?

Structure of the course

- In-person lectures
- Discussion: use the help of the TAs to complete your assignments, to clarify doubts before quizzes and the final exam
- Three assignments
 - 50% of the total grade
- Four graded quizzes
 - 25% of the total grade
 - The lowest grade will be dropped – so **no make up quiz** if you get sick/cannot attend/forget/etc.
- Final Exam
 - 25% of the total grade
- Typically I don't curve the grades.
 - But reserve the right to do it if necessary.

Basic tenor of Ed Discussion

- Clarify project specs
- Some discussion of ideas between the students in Ed Discussion
 - Perhaps with disagreements
 - But always with constructive criticism
 - Sometimes there is more than one right answer...
 - **But there are many wrong answers!**

***Special needs:** Students who may need an accommodation due to a disability should contact the UCI Disability Services Center at (949) 824-7494 as soon as possible to explore the possible range of accommodations.*

We encourage all students having difficulty, whether or not due to a disability, to consult privately with the instructor at any time.

Questions?

Please, write any questions in Ed Discussion!

Our definition of information retrieval

The activity of searching and extracting information from a collection of information resources.

In **this class** : textual information from text documents
